

Cold Cup Applications

Series CS-340 In-Line/Series CS-450 Sanitary Quick Change Filter Systems

The CunoOCS® line of filtration products are carefully designed to protect beverage equipment, provide consistent beverage quality, and ensure seamless beverage service.

The Series 340 and 450 are an economical way to provide maximum equipment protection and consistent beverage quality for low volume cold cup applications.

The encapsulated design minimizes contamination of the filtration media.

A unique tapered design adds strength and ensures efficient filtration performance.

The compact footprint allows the unit to be installed snugly behind the beverage unit or neatly under a cabinet.

The CS-340's reinforced 1/4" connections are compatible with common equipment and tubing installations and provide ease of installation in tight spaces.

The CS-450's sanitary quick change head configuration with 1/4" female pipe thread connections allows ease of changeout without tools.

Units are FDA, CFR-21 compliant for use in all food and beverage applications.

Two (2) premium technologies are available for differing water conditions.

Sediment, Chlorine Taste and Odor Reduction

CS-342

Capacity: 1500 gallons (5,678 liters) or 200 cups/day*

- In line system with reinforced 1/4" NPT connections

CS-452

Capacity: 1500 gallons (5,678 liters) or 200 cups/day*

- Sanitary Quick Change head configuration with 1/4" female pipe thread connections

Features

- Built-in 5 micron prefiltration
- Chlorine taste and odor reduction

Benefits

- Efficiently traps and holds sediment without unloading
- Reduces maintenance caused by clogged valves and orifices
- Enhances beverage quality over the life of the filter

*Cups/day based on 8oz cup (237 ml), 20 day work month and 6 month changeout schedule.
