

VEN Series Sanitary Quick Change Systems — A True Choice For Improved Water Quality

The new CUNO® VEN series of OCS products are designed to provide improved water quality and seamless beverage service specifically for vended beverages. Cup quality is especially important in this application to ensure repeated customer satisfaction.

The VEN Series proprietary patented interconnect and head design ensures the use of high quality CUNO replacement cartridges, time after time.

Welded 3/8" John Guest connections are compatible with plastic and copper connections.

The integral mounting bracket makes installation quick and easy.

The ramped interconnect completely disconnects the cartridge from the filter head with only a 1/4 turn, making this the easiest changeout in the industry, especially in tight areas behind the machine.

A built-in shut off valve allows cartridge changeouts without shutting off the water supply.

The sanitary quick change design allows for quick and easy cartridge change-outs and minimizes contamination of the filtration media.

A True Choice for Improved Water Quality

All CUNO premium quality VEN series products provide:

- **Chlorine Taste and Odor reduction** — makes the difference you can taste
- **Sediment reduction** — improves beverage clarity
- **Built-in KDF® media** — reduces unscheduled service calls due to water borne slime build-up and hard scale build-up
- **Ensured system function without activation**

Choose the system that is right for your needs:

Drinking Water Quality

VH3/VEN350-K

Capacity: 3,500 gallons (13,249 liters) or 56,000 cups (8 oz. vend.)
Flow Rate: 1 gpm (3.78 lpm)

Features

- Graded density, compressed carbon block
- 0.5 micron cyst, turbidity, fine sediment reduction
- KDF Media

Benefits

- Reduces the health effects associated with filterable cysts
- Maximizes the effective life and chlorine removal capability of the system while reducing fine particles associated with cloudy beverages

Beverage Quality Water

VH3/VEN351-K

Capacity: 3,500 gallons (13,249 liters) or 56,000 cups (8 oz. vend.)
Flow Rate: 1 gpm (3.78 lpm)

Features

- 1 micron graded density, Multi-composite carbon block
- KDF Media

Benefits

- Traps and holds particles over the life of the filter for consistent beverage clarity
- Increased contact time reduces chlorine taste and odor to over 96%

Maintenance Quality Water

VH3/VEN355-K

Capacity: 3,500 gallons (13,249 liters) or 56,000 cups (8 oz. vend.)
Flow Rate: 1 gpm (3.78 lpm)

Features

- 5 micron graded density Multi-composite carbon block
- KDF Media

Benefits

- Protects equipment from the effects of water conditions with heavy dirt load
- Extends the usable life of the filter
- Reduces maintenance caused by clogged valves and orifices

Maximum six month changeout recommended.
