

Specialty Applications

VH3/OWS200-L Office Water System

The new CunoOCS® line of filtration products are designed to provide improved water quality and seamless beverage service.

The OWS200-L proprietary patented interconnect and head design ensures the use of high quality CUNO replacement cartridges, time after time.

The OWS200-L Office Water system is designed to remove lead and cyst contaminants in addition to chlorine taste and odor from drinking water. This system is ideal for bottle-less water coolers, drinking water fountains and dedicated drinking water faucets.

The ramped interconnect completely disconnects the cartridge from the filter head with only a 1/4 turn, making this the easiest changeout in the industry!

The built in shut off valve allows cartridge changeouts without shutting off the water supply.

The new horizontal connections reduce pressure drop, therefore extending the life of the filter system.

Welded 3/8" John Guest connections are compatible with plastic and copper connections.

The integral mounting bracket makes installation quick and easy.

The sanitary quick change design allows for quick and easy cartridge change-outs and minimizes contamination of the filtration media.

A True Choice for Improved Water Quality

All CUNO premium quality OWS products provide:

- Chlorine Taste and Odor reduction — makes the difference you can taste
- Sediment reduction — improves beverage clarity
- Reduces unscheduled service calls
- Extends equipment life
- Ensured system function without activation

Office Water System with Lead and Cyst Reduction

OWS200-L

Capacity: 1,500 gallons (5,678 liters)

Flow Rate: 0.9 gpm (3.4 lpm)

Features

- Multi-composite carbon media
- Advanced single stage filtration
- 0.5 micron fine sediment reduction

Benefits

- Provides maximum adsorption of lead contaminant
- Provides fine filtration for cyst reduction
- Reduces sediment, chlorine taste and odor
- Does not require activation
- Economical operating costs
- Requires only one filter to change
- Assures beverage clarity and consistent water quality over the life of the filter

For cold water use only. This product is for commercial use only. All materials are FDA compliant with CFR title 21. This is a mechanical, chemical filter.

Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.

Systems certified for cyst reduction may be used on disinfected waters that may contain filterable cysts.

System tested and certified by NSF International against NSF/ANSI Standards 42 and 53 for the reduction of the claims specified on the PDS Sheet.
